

What's New in MicroStrategy 9 for Administrators

Overview:

This 2-day course provides an overview of the features and functionality available in MicroStrategy Intelligence Server, Distribution Services, Integrity Manager, Object Manager, Command Manager, and Enterprise Manager for MicroStrategy 9. Numerous enhancements have been made to these products in this version. This course covers the most important, high-profile changes. The course assumes that you are already familiar with the functionality of these products and related terminology. Throughout the course, you will gain hands-on practice with new features through a series of exercises.
