

MicroStrategy Desktop: Reporting Essentials

Prerequisite to all MicroStrategy Courses

Overview:

This two-day course provides students with an overview of the extensive reporting capabilities of MicroStrategy Desktop. Participants will leave with an understanding of report creation and the numerous data and style report manipulations in MicroStrategy Desktop, including auto-style creation, drilling, data pivoting, page-by, outline mode, grid and graph formatting, and thresholds. Additionally, participants will be versed in the creation of basic components that are essential in the creation of reports, including report filters, metrics, MicroStrategy OLAP Services features, prompts, and searches. Students will also understand report design principles that leverage the capabilities of MicroStrategy Desktop. All lectures will be reinforced with hands-on exercises.

Cost:

- US\$1,300 per person

MicroStrategy Products Covered:

- MicroStrategy Desktop

Number of Days:

- 2 days
