

MicroStrategy Web for Reporters and Analysts

Overview:

This two-day course is designed for end users of MicroStrategy Web™. Specifically, this course covers functionality available to users at the Web Reporter and Web Analyst levels. Students will leave with a thorough understanding of the power and flexibility of the MicroStrategy Web interface. Students will learn how to perform basic and advanced analysis on reports and documents using MicroStrategy Web. They will also learn about basic report creation. Students will have the opportunity to practice with hands-on exercises for executing and manipulating reports and documents and formatting and creating reports in MicroStrategy Web.
