

MicroStrategy Desktop: Advanced Reporting 100

Second Course in the following:

- Certified Report Developer Program
- Report Developer Track

Overview:

In this three-day course, participants will leave with a thorough understanding of the most powerful capabilities of MicroStrategy Desktop. Participants will learn how to create numerous types of advanced metrics, including level metrics, non-aggregatable metrics, transformation metrics, and conditional metrics. Students will also learn how to create different types of advanced filters, including joint element lists, dynamic date filters, and relationship filters. Students will then learn about consolidations and customer groups and advanced uses of prompts and OLAP Services. The course concludes with lessons on creating custom drill maps, report data options, and the use of other report developer tools, such as Find and Replace and the Project Documentation Wizard.
