

MicroStrategy Desktop: Advanced Reporting

Second Course in the following:

- Certified Report Developer Program
- Report Developer Track

Overview:

In this three-day course, participants will leave with a thorough understanding of the most powerful capabilities of MicroStrategy Desktop. Participants will learn about and create numerous types of advanced metrics including: level metrics, conditional metrics, non-aggregatable metrics, transformation metrics and custom metrics. In addition, students will explore the uses of custom groups and consolidations, as well as develop a solid understanding of the different types of filters and prompts, including relationship filters, joint element lists and dynamic date filters. Students will conclude the course learning about custom drill maps, advanced report data options and report developer tools and preferences.
