

MicroStrategy Enterprise Manager Essentials

Overview:

In this 1 day course, students learn how to use MicroStrategy Enterprise Manager™ to monitor and analyze their MicroStrategy implementation. After an introduction to Enterprise Manager, they learn about the Enterprise Manager project and how to use its reports to analyze their MicroStrategy projects, system performance, and user activity. Next, they learn about the Enterprise Manager project's logical data model and metrics in order to create their own, custom Enterprise Manager reports. Finally, they learn how to configure Enterprise Manager and maintain it over time.

Cost:

- US\$650 per person, or 1 LU

Number of Days:

- 1 day

Who Should Attend:

- MicroStrategy administrators
- MicroStrategy project managers
