

MicroStrategy Web Administration and Tuning

Overview:

This one-day course is designed to provide students with a basic knowledge of MicroStrategy Web (ASP.NET version) administration and tuning. Participants will become familiar with the various administrative settings available in MicroStrategy Web, and how to use those settings in tuning their environment. Students will also learn how to resolve various Web issues such as those related to slow system performance, timeouts and exports. These topics will be reinforced with hands-on workshops and interactive discussions. At the end of this course, students will have an understanding of the important concepts related to the MicroStrategy Web architecture and administration. Students will also gain an understanding of the tuning recommendations for MicroStrategy Web server, including Windows operating system, IIS and ASP.NET.
