

MicroStrategy Web Professional Track

Overview:

In this 5-day track, students learn the capabilities of MicroStrategy Web and Report Services to manipulate and create sophisticated boardroom-quality reports and documents. The Report Analysis course covers functionality available to users at the Web Reporter and Web Analyst levels. Students learn about the power and flexibility of the MicroStrategy Web interface, including how to conduct basic and advanced analysis on reports and documents. They will also learn about basic report creation. The Report Design course is designed for MicroStrategy Web report designers who use the Web Professional version of MicroStrategy Web. Students will learn about additional methods to create reports and how to create report filters and templates using Design Mode. Students will also learn how to perform basic formatting changes to documents. The Document Essentials in MicroStrategy Web course focuses on basic document creation with the Document Editor in MicroStrategy Web and instructs students on the many features and functionalities of Report Services. Finally, the Dynamic Dashboards 100 and 200-level courses teach students how to create interactive DHTML and Flash dashboards using the Document Editor in MicroStrategy Web. All of the courses include hands-on exercises.
