

MicroStrategy Analytics Platform™ in the Cloud Now Available on FedRAMP Marketplace Via IntelliCog

May 9, 2019

MicroStrategy Federal IT Summit to Showcase First and Only FedRAMP-ready Enterprise Analytics Solution in the Cloud

TYSONS CORNER, Va.--(BUSINESS WIRE)--May 9, 2019-- [MicroStrategy](#)® Incorporated (Nasdaq: MSTR), a leading worldwide provider of enterprise analytics and mobility software, today announced that the MicroStrategy Analytics Platform is now available on the Federal Risk and Authorization Management Program (FedRAMP) marketplace via IntelliCog Enterprise Cloud Analytics (ECA). IntelliCog ECA, a cloud service provider delivering end-to-end business intelligence and data analytics solutions, is authorized at a FedRAMP moderate level.

IntelliCog ECA is FedRAMP authorized to deliver MicroStrategy in the cloud through the [FedRAMP marketplace](#), a government-wide program that provides a standardized approach to security assessment, authorization, and continuous monitoring for cloud products and services. FedRAMP empowers government agencies to rapidly adapt from old, insecure legacy IT to mission-enabling, secure, and cost-effective cloud-based IT.

Federal agencies can now tap IntelliCog ECAs Software as a Service (SaaS) offering to host their MicroStrategy implementation in the cloud, enabling the agencies to comply with an [OMB mandate](#) requiring that cloud services holding federal data are FedRAMP authorized.

"In order to innovate quickly while reducing costs, it is important for today's federal agency CIOs and CISOs to consider cloud service and analytics providers that are committed to meeting the highest standards of security, reliability, and scalability," said Michael J. Saylor, CEO, MicroStrategy Incorporated. "We believe our current and prospective customers in the federal space will be very pleased to work with IntelliCog and MicroStrategy to support their large-scale digital transformation initiatives in the cloud."

Join Us at the Upcoming MicroStrategy Federal IT Summit

MicroStrategy will host its Federal IT Summit on May 16, 2019 at the Renaissance Washington, DC Downtown Hotel. The Federal IT Summit will feature MicroStrategy's HyperIntelligence™ offering, a new category of analytics designed to transform the way people interact with information and find answers by seamlessly delivering intelligence through zero-click experiences and HyperCard™ applications. In addition, the Summit will provide opportunities for MicroStrategy's current and potential federal agency customers to participate in hands-on workshops, hear from top agencies on how they have successfully implemented MicroStrategy software and services, and explore how they can adopt an industry-leading enterprise analytics platform to help drive operational efficiencies and large-scale digital transformation initiatives within their organizations. Attendees will also be able to learn about how they can move analytics workloads to the cloud with IntelliCog ECA, Microsoft Azure, and Amazon Web Services.

"Moving business applications to the cloud enables federal agencies to more efficiently deploy analytics solutions, allowing them to focus their attention on the top priorities for achieving agency missions and goals," said Rick "Ozzie" Nelson, Vice President and General Manager, Public Sector, MicroStrategy Incorporated. "Our goal is to make it easy for federal agencies seeking to move their on-premises analytics solutions to the cloud. Federal agencies can join us at MicroStrategy's Federal IT Summit to learn more."
