

# Can You Keep the Pace?

At MicroStrategy, challenges excite us. So do powerful technologies. We provide software solutions and expert advice that empower companies with actionable intelligence. And we're not afraid of embracing the pivots that occur in a dynamic product environment to make that happen. We like a good challenge – and we're looking for others who do too.

## WHY TECHNOLOGY AT MICROSTRATEGY?

As a member of our team, you'll be a part of building the next generation of our business intelligence and analytics platform. We're striving for best-in-class products, which creates challenging projects and allows you to pursue your technology interests. Our fast-paced and agile environment encourages creativity and collaboration. You'll also get the latest industry training during Bootcamp, experience working with a modern technology stack, and exposure to some talented innovators in the field.

Curious about our product? Download our free desktop version on our website.

## DO YOU HAVE WHAT IT TAKES?

We're looking for analytical, out-of-the-box thinkers with a background in computer science, information systems, engineering, or a related field. You'll fit right in if you love teamwork and think like a user when building code, making product improvements or looking for bugs. Attention to detail is also key to success (precise is one of our values).

We're hiring a variety of technology positions for our Washington, D.C. area headquarters:

- Associate Software Engineers
- Associate Software Engineers in Test
- Associate Quality Analysts
- Technology Associates (1-year rotational program)
- Software Engineer Interns
